# SYNCHRONOUS IS MORE THAN SCREENSHARING

1 PLAN AHEAD & SET EXPECTATIONS

To move beyond screensharing you have to plan for a successful synchronous session. There are a lot of moving parts and participants need to understand the expectations.

2 USE THE TECHNOLOGY

There are many technology tools in the 21st century that enhance teaching and learning. Explore and utilize the tools that offer features that help facilitate synchronous learning.

3 ASSESS & GIVE FEEDBACK

Move beyond using synchronous time to review assessments and instead use it to assess, evaluate, give feedback, and improve student performance.

4 BE INCLUSIVE

Make sure to fully engage all learners. Screensharing alone does not check the box for many student's needs. Add inclusive elements to remove any barriers for student participation.

While screensharing is one method used in synchronous online learning, it only serves as one aspect to a broader approach of fully utilizing real-time online education.
